ADDITIONAL INFORMATION

SIDE PROJECTS
XIV-Gear Set - Final Fantasy 14 Character Gearset
Planner Full Stack Project, React, Redux, Express

- Architected a full-stack application enabling users to seamlessly interact with front-end interface, extracting data from an Express.js back-end that retrieves information from external RESTful APIs
- Designed and implemented intuitive user interfaces using React.js, fostering reusability through component-based layouts
- Explore the project here: https://xivgearset.netlify.app/

SIDE PROJECTS
Doodle-heep - Google Keep clone App Single Page App,
React, MUI

- Note taker App that imitates the behaviors and looks of the Google Keep.
- Utilized HTML5 local storage api for offline practicality.
- Functions include: Archives, Reminder, deletion, and searching.
- Explore the project here: https://doodle-heep.netlify.app/
